User guide: How to search the library of policy resources

The library of policy resources contains links to published outputs such as briefing notes, consultation responses, policy reports and reviews. To search the library, please select your search terms using the ‘keywords’ box.

You can select to search for resources that match any selected term (‘or’) or only those that match all selected terms (‘and’). You may include or exclude “dead” (expired) links dependent on preference.

You can further narrow your search by selecting the resource and/or organisation type.

If you wish to further filter your search outputs, you can use the additional search term box.
